# ★ACMS

ACMS: American Construction Management Services specialize in insurance claim and reconstruction process. We focus on guiding clients through the complexities of post disaster recovery.

Focus on the reconstruction efforts to get you back in business. We are an equitable partner—making sure all parties are satisfied. (Parties being construction, insurance company, and customer. A positive we'll documented approach to insurance recovery) our job isn't done why the insurance company fulfills the claim, it's done when you are back, reconstructed (pre-loss condition), stronger than before. We are not property loss attorneys or adjusters. ACMS does it right and has been doing it right for over 30 years. Brand descriptors: trusted, trained, certified, thorough, accurate, transparent process, authority, security.

“We were there when your grandfather needed us”

“From a barn to The Ritz—if there is a fire—we will be there”

“There is nothing exact to a disaster, but we know exactly what to do”

“We accomplish your goals together, full scope, getting it done the right way”

Moving forward it is crucial to convey expertise in your services through experience, trust, and authority. Making the decision for the client a no brainer. Also having transparency in the client experience process and previous work.

IMAGERY

**CONSISTENTLY EXCEEDING CLIENT EXPECTATIONS**

"I COULD HAVE SWORN, BASED UPON THE PROJECT TURN ON A BUDGET BUDGET, THAT THIS BUILDING WOULD BE A BUDGET BUDGET. THAT WAS TO BE DISAPPOINTED BY THE TRUTH."

— ROBERTA HARRIS, ACMS
